NOTE TO: FROM: SUBJECT: Old Subjects

The command "Q DOC (SEEN" indicates that you have not yet viewed this. Sometimes AIM makes mistakes on these things, but in the event that it did not, I am retransmitting a old note. Look particularly at numbered paragraph 2. Just like old times.

*** APPENDED BY: Leo Hazlewood ON: April 2, 1986 AT: 7:29 AM ***

NOTE TO:
FROM:
SUBJECT: DA Five-Year Plan

As I mentioned to Tom the other day, I have a number of questions coming from a reading of the DA's Five Year Plan, FY 1986-1990. As time allows, I would like to get briefed (as informally as possible) on each of these areas.

- 1. There is an under-current throughout the Plan that we now have the recruitment problem under control because the rate of addition of new positions will stabilize. I would like someone from OP to walk me through how we determine what numbers of people we need to recruit. I am particularly interested in how the numbers for things such as attrition are calculated.
- 2. OS (at IX-3) and elsewhere projects the numbers of people who must undergo investigation/reinvestigation polygraphs and so forth. How are these numbers put together? What assumptions are used?
- 3. The OS section (at IX-4) references SIMS, SCIP, and institutional memory databases (this might be my phrase). I would like to know more about all of the databases that OS references. Specifically: (a) are they on VM; (b) who keeps them up; (c) are they included in the Corporate Database Program; (d) what are they used for; (e) are there planned software developments to replace/augment any of them?
- 4. OIS (at IV-4 and IV-5) references (a) IPD computer systems, (b) Released Information Management System (RIMS), and "regulatory process

SUBJECT: DA Five-Year Plan

automation". What do these things do, for whom, and where do they reside? Are they to be part of Corporate Data? Should they be?

- 5. Is the TRAVELER database referenced in OP (VIII-6) the same as OF's ATS system (III-3)? It would appear so, but if not I would like to know what each does.
- 6. OMS is all over the map with items that I would like to know more about. They mention their "selection methodology" (VII-3), work in artificial intelligence (e.g., the OMS AI system at VII-5 and MIDAS at VII-4), and the need to improve and expand the agent medical database information. What is the "selection methodology"? What are they doing now in AI and how does their effort relate to what is going on in ORD, OD&E, ASG, or elsewhere in the Agency?

That should do for starters. In time, this will show up on the ACTIONS list. For now, schedule these when you can over the next few weeks. Thanks.
